

BIRD UNLOADER

Model No. ABU-313

The Cantrell Automatic Bird Unloader is USDA approved and operates on any type shackle configuration. Designed for maximum processing line efficiency, the unloader is directly driven from the overhead conveyor. This insures synchronicity with the line providing positive positioning and reduced shackle bending or jamming. The unloader fits easily into any overhead configuration, is simple to install and requires minimal maintenance. As always, Cantrell assures you the ultimate in processing equipment efficiency.
