

▶ Automatic Giblet Wrapper Model No. CGW-9, CGW-11, CGW-13

▶ The Cantrell Automatic Giblet Wrapper wraps giblets (heart, liver, gizzard and neck) individually at a rate of 100 packages per minute. Located in front of the giblet holding bin, separated giblets are placed in individual trays of the gib-wrap infeed conveyor. The conveyor carries the giblets to the wrapper and unloads onto specially designed paper. The paper is folded, sealed, perforated and cut to standard size packages.

➤ Automatic Giblet Wrapper Model No. CGW-9, CGW-11, CGW-13

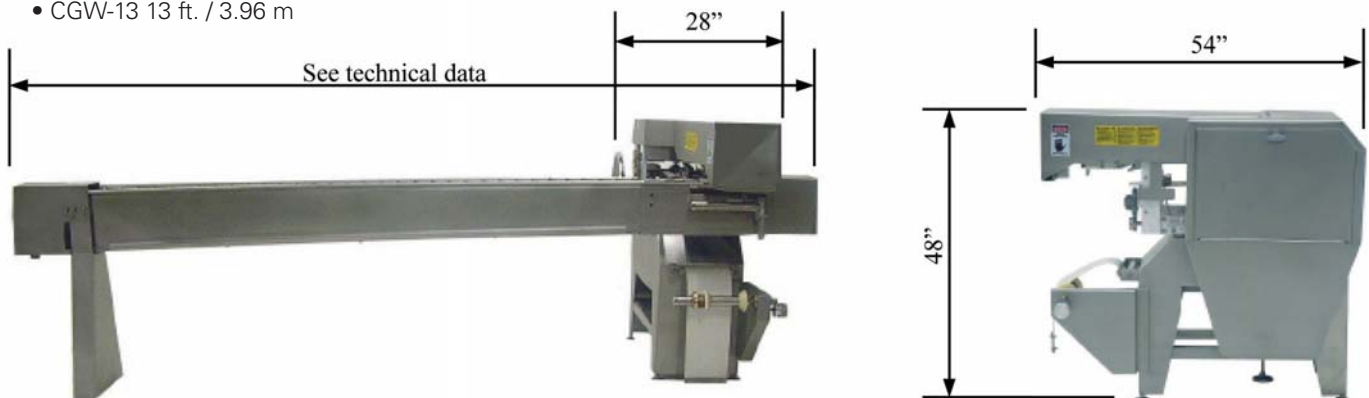

Advantages

- Saves an average of 3-5 people on a typical 6,000 BPH operation
- Compact design requires little space
- All stainless steel construction
- No air or vacuum required
- Removable covers allow for quick clean-up

Variations

The Automatic Giblet Wrapper is available with 3 different infeed conveyor lengths:

- CGW-9 9 ft. / 2.74 m infeed
- CGW-11 11 ft. / 3.35 m
- CGW-13 13 ft. / 3.96 m
