

▶ Hock Cutter Model No.PHC-4

▶ The Cantrell Automatic Hock Cutter Model PHC-4 is a field proven technique of cutting hocks on broilers as well as hens.

Due to the simple design of few moving parts, you can expect the Cantrell Hock Cutter to give you continuous day-in, day-out precision cutting performance. By use of a specially designed chain, the hock cutter automatically positions and severs the hock joint by nicking, disjuncting and cutting the joint completely off or to the last tendon for auto rehousing.
