

HELICAL LINE DIVIDER

Model No. GLD 300-B

The Helical Line Divider offers the optimum in design efficiency to provide the processing plant a line divider that is virtually maintenance free.

The Helical Line Divider will operate on a two piece or rigid shackle and eliminates hang-ups. It provides a rigid work area on the line for the operator or inspector, as the divider keeps the shackle firm on the divider bar for proper positioning for working bird and inspection.

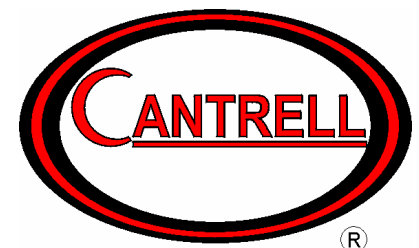

The Helical Line Divider is exclusive in the industry, reduces spare shackle inventory, allows for only one type shackle to be used in plant; and the versatility of the Line Divider makes it applicable for other bird presentation to other personnel on eviscerating line.
