

# ROTARY SEPARATOR (OFFAL)

Model No: OFFAL-OS-1

The Cantrell Rotary Separator for offal separates water from the refuse. The perforated stainless steel drum can be supplied either belt or chain driven. This unit is supplied with stainless steel auger flights inside the drum to insure the offal is moved through the separator quickly. Standard diameter is 38" although other diameters are available. The offal separator is constructed of heavy duty stainless steel.
